

PRODUCT INFORMATION

SUPER 1 LOCKSPRAY

CHARACTERISTICS

Lockspray is a highly developed rust solvent lubricant, and when applied, the penetration effect is exceptional.

Lockspray is resistant to caustics such as acid. The product is water-repellant and resistant to salt water, steam etc.

Lockspray can be used directly in and out all locksystems. The product is very effective and will not attract dust and dirt as most lubricants, at the same time the protection against corrosion will be insured.

QUALITIES & ADVANTAGES

- Dissolves rust and corrosion.
- Quick penetration.
- Lubricates.
- Reduces wear and tear.

PHYSICAL DATA

VISCOSITY $v/40\text{ }^{\circ}\text{C}$ (cSt)	7.4
VISCOSITY $v/100$ - (cSt)	2.55
BOILING POINT, $^{\circ}\text{C}$	200
DIELECTRICAL POWER, kW	20
COPPER CORROSION, ASTM D-130	1A
SPEC. GRAVITY at 20°C	0.930
COLOUR	TRANSPARENT BROWN

- Frees sticky mechanisms.

ANTI-WEAR AND TEAR QUALITIES

- Reduces friction.

ANTI CORROSION INHIBITOR

- High effect on penetration and as a rust solvent.

APPLICATION

- Can be applied with a brush.
- Can be applied with a spray can.

TYPICAL AREAS OF APPLICATION:

- Where good lubrication and rust prevention is necessary.
- Locker lubrication.
- Easy maintenance.
- Reduces mechanical noise, machines, locks, trailers and chains.
