

PRODUCT INFORMATION

SUPER 1 STOP CONDENS

CHARACTERISTICS

Stop Condens is an additive suitable for all engines and highly effective added to the fuel directly in the tank or reservoir.

Stop Condens can be used also for cars with catalytic converters.

Stop Condens will neutralise the build-up of condens especially in the winter season.

QUALITIES & ADVANTAGES

- Stabilises ignition and improves combustion, especially at low temperatures.

- The valves will work more smoothly.

APPLICATION

- All gasoline engines, including stationary engines.

TYPICAL ADDITION SCALE:

Mixing

- 2 : 1000 (2 liter per 1000 liter Fuel)
or 200 ml per 100 liter Fuel – at all Temperatures.
or 2 ml per 1 liter.
