

PRODUCT INFORMATION

EP CHAIN OIL

CHARACTERISTICS

EP Chain Oil is a special type of chain oil with a very strong molecular film to protect the chain and the chain-saws under operation and shock load.

EP Chain Oil belongs to the non-drip type of oil.

EP Chain Oil will secure longer life on the chain/chainsaw and components in general.

QUALITIES & ADVANTAGES

Displays the lubricating effect by prolonged chain life, gear wheels etc.

ANTI-WEAR AND TEAR QUALITIES

Selected EP (Extreme Pressure) additives reduce wear and operating temperature on chains under stress.

PHYSICAL DATA

ISO-GRADE	150
VISCOSITY (cSt) mm ² /s at 40°C	150
VISCOSITY (cSt) mm ² /s at 100°C	15.8
POUR POINT, °C	÷15
SPEC. GRAVITY at 20°C	0.894

CORROSION INHIBITOR

Anti rust and anti corrosion properties maintains all chain connections and joints in order.

APPLICATION

Especially formulated oil particularly suited for chain swords. The non-dripping capabilities makes it suitable for industrial chains in conveyors, converters etc.

SAFETYFAX

- Avoid prolonged contact with skin.
- Keep petrochemicals away from children.
- If swallowed, do not induce vomiting - call a doctor.
- Do not inhale fumes.
- Do not dispose of empty oil cans or oil waste in the environment.
